

Circular connectors M5 to M12

Product overview 2018/2019

Circular connectors for demanding applications

The PLUSCON circular M5 to M12 product range from Phoenix Contact contains standardized circular connectors. These have become the industry standard in various areas of application.

The wide selection of designs enables comprehensive connection solutions for devices with data rates up to 10 Gbps. Versions are also available for signals up to 17-pos. and for supplying power up to 630 V and 16 A.

Signals up to 17-pos.

- Currents up to 4 A
- Voltages up to 250 V
- Available with an optional shield connection

 Web code: #0680

Data up to 10 Gbps

- Codings for all commonly used fieldbus systems
- Hybrid connectors for simultaneous data and power transmission (Power over Ethernet)
- Components according to CAT6_A

 Web code: #0682

Power up to 16 A/630 V

- Connection cross sections up to 2.5 mm²
- For 1-phase and 3-phase line voltage applications
- Safeguarded against connection errors for AC and DC applications

i Web code: #0681

Find out more with the web code

You can find web codes in this brochure: a pound sign followed by a four-digit number combination.

i Web code: #1234 (example)

This allows you to access information on our website quickly.

It could not be easier:

1. Go to the Phoenix Contact website
2. Enter # and the number combination in the search field
3. Get more information and product versions

Or use the direct link:
phoenixcontact.net/webcode/#1234

Unique variety for signals, data, and power

The pace of development of industrial electronics constantly places new demands on device connection technology.

Phoenix Contact is your innovative partner for practice-oriented integration of device connectors in almost all applications.

The modular structure of device connectors facilitates the simple and cost-effective integration of various data, signal, and power supply pin assignments into a device concept.

For high contact density

For fast data transmission

For high performance

Device connectors with litz wire and cable connection

Pluggable device connectors with litz wires or round cables are available in sizes M5, M8, and M12 as an alternative to a fixed cable connection. Thanks to a wide range of housing designs, Phoenix Contact can offer an appropriate solution for every individual application.

Variety of mounting options

Front mounting

Rear mounting

Modular mounting

Main features

- Pre-assembled with litz wires or cables
- Optional shield connection
- Various assembly methods with metric or Pg fastening threads

Advantages at a glance

Pre-assembled cables

- No field assembly necessary
- Various cable lengths and assemblies

Easy positioning

- Defined cable outlet direction

Safe mounting

- XL housing versions simplify the device cut-out
- Increased safety and tightness, thanks to tightening limitation

Reliable seals

- When unplugged
- Device electronics protection

Reliable transmission

- 360° shield connection
- Fieldbus-specific cables

Fieldbus-specific coding

- Protection against mismatching, thanks to colored and mechanical fieldbus-specific codings

Device connectors for PCB connection

Phoenix Contact offers a wide range of one-piece and two-piece device connectors for PCB assembly in M5, M8, and M12 types. This provides you with a wide range of connection solutions for wave, THR, and SMD soldering processes.

The two-piece device connectors let you implement all numbers of positions and codings for signal, data, and power supply in identical mechanical installation conditions.

PCB connection

One-piece and two-piece,
for wave soldering processes

Two-piece,
for SMD processes

Two-piece,
for THR processes

Main features

- One-piece connectors for the wave soldering process with 6 mm and 12 mm contact lengths
- Available with an optional shield connection
- Two-piece device connectors for wave, THR, and SMD soldering processes in all available numbers of positions and codings
- Easy housing integration, thanks to uniform design-in

Advantages at a glance

Unique tolerance compensation

- M12 VARIOPORT screw connection compensates for process-related production tolerances between the housing and PCB

Versatile device port solutions

- Use of housing screw connections with threaded fastening, press-in contour or for direct integration into the front panel

Automatic pick-and-place assembly

- Tape-on-reel or tray packaging

Secure power transmission

- PE connection to the device housing

Reliable protection

- Additional gasket for the device when not plugged in

Identical mechanical installation conditions

- All numbers of positions and codings on one PCB level

Seamless shielding

- Shield connection to the PCB via shield spring

Connectors and cables for field cabling

Connect your devices quickly and safely in the field. You can wire different cable types and lengths on-site with connectors for assembly.

You have access to a comprehensive product range of assembled cables for quick and convenient field cabling. Halogen-free PUR cables, which we use as standard, already meet the requirements in many fields of application.

Wide variety of cabling

For fieldbuses and networks

For signals,
3 to 17-pos.

For power,
up to 16 A/690 V

Main features

- Short connect time, thanks to push-pull fast locking system
- The right cable and connector for every application
- Flexible cabling arrangement, thanks to connectors for assembly in socket and pin versions
- Customer-specific assemblies and cable lengths

Phoenix Contact offers comprehensive shielding concepts and torsion-resistant cables for reliable operation of systems and robots.

Advantages at a glance

Fast locking with a click

- Non manufacturer-specific M12 push-pull locking system for signal and data transmission (PROFINET CAT6_A)

Push-in connection

- Easy, secure wiring for all conductor and insulation types with and without ferrules

IDC insulation displacement connection QUICKON

- Fastest connection on the market, gas-tight contact and vibration-resistant

Crimp connection

- Extremely compact
- Connection capable of automation for high production volumes

Screw connection

- Well-known connection technology for all conductor and insulation types

Pierce connection

- Reliable connection in very tight installation spaces

You benefit from an excellent level of service

Different colors, shapes, markings or customized cable assemblies provide you with a wide range of options. In addition to customer-specific adaptations, we also realize innovations individually tailored to your needs. We will provide you with support from the initial concept through design-in and production to quality assurance.

Customer-specific adaptations

Whether you need individual colors, complete cable assemblies, special printing or a specific number of contacts, we will be happy to help find solutions adapted to customer-specific requirements.

Individual new products

In addition to customer-specific adaptations, we also realize innovations individually tailored to your needs. We will be there every step of the way to provide you with help and support, from initial concept to design-in and production through to quality assurance. Why not make use of our extensive development and manufacturing expertise for your individual solution.

Service and support

During the design-in process, we provide assistance with state-of-the-art selection guides, comprehensive product and technology information and also advice tailored to your individual requirements – anywhere in the world.

Wide range of color versions

Customer-specific cable assemblies

Individual printing

Special punching, coding, and pin lengths

Connection block for temperature sensors

Hybrid connector for charging stations

Connection system for LED street lighting

Compact controller with front connection technology

Fast selection of products in the web portal, thanks to many convenient functions, such as online configurators

Convenient 3D data download of your required product

International training provided to customers on products and technologies

In dialog with customers and partners worldwide

Phoenix Contact is a globally present, Germany-based market leader. Our group is synonym for future-oriented components, systems, and solutions in the fields of electrical engineering, electronics, and automation. A global network across more than 100 countries, and 15,000 employees ensure a close proximity to our customers, which we believe is particularly important.

The wide variety of our innovative products makes it easy for our customers to find future-oriented solutions for different applications and industries. We especially focus on the fields of energy, infrastructure, process and factory automation.
