## Panasonic

## Product Highlights

## COMPONENT GUIDE

Technology leading components for automotive and industrial systems

## Introduction to electromechanical relays:

Telecommunications, machine construction, measurement and control systems, automotive electronics, building security and installation today there is virtually no branch of human activity that can exist without using modern relays. Panasonic is able to meet both simple and complex demands from its vast range of sophisticated, economic switching technologies by offering the most appropriate relay to solve specific applications. With over 30 years experience at the forefront of relay innovation and development, Panasonic today offers one of the world's most comprehensive ranges of electromechanical and semiconductor types. Load switching capability ranges from low-level signals to high level values. Panasonic relays are available for all common mounting configurations with screw solder or surface mount terminals.
Contact materials and their attributes

| Contact material | Ag (silver) | Highest electrical and thermal conductivity of all metals which contributes in low contact resistance |
| :---: | :---: | :---: |
|  | AgSnO2 (silver-tin) | Exhibits superior welding resistance against capacitive loads which result in high inrush currents and low contact erosion for inductive loads |
|  | AgW (silver-tungsten) | Also known as tungsten pre-contact. Realized in special type of $D J$ relay (on request) for handling inrush currents up to 600A on request. |
|  | AgNi | Excellent arc resistance which leads to very low contact erosion while switching off inductive loads |
|  | AgPd (silver palladium) | Advantageously for low level loads with inrush characteristic |
| Surface finish | Au clad (gold clad or gold plating) | great corrosion resistance especially in adverse atmospheres (pressure welded onto a base metal) uniform thickness and non-existent pinholes |
|  | Au flash plating ( 0,1 to $0,5 \mu \mathrm{~m}$ ) | protection of the contact base metal during transport \& storage will be destroyed after several switching cycles due to low thickness |

The design of Panasonic relays is optimized, and contacts are the most important elements of relay construction. Contact performance is influenced by contact material, voltage and current values applied to the contacts, type of load, frequency of switching, ambient atmosphere, form of contact, contact switching speed, bounce..

## DW-H series:

Strong performance at a great price

Size in mm: $24 \times 10 \times 15.8$ (LxWxH)

Compact 16A high power relay with 1 Form A / 16A contact
) Reflowable (LCP material) type available
> EN 60335 (PBT material) type available
) 16 A switching current
〉 Small dimensions
> Low profile type available

| Switching current | 16 A |
| :--- | :--- |
| Max. switching voltage | 277 V AC |
| Contact arrangement | 1 Form A |
| Breakdown voltage between <br> open contacts | 1000 Vrms |
| Breakdown voltage between <br> contacts and coil | 5000 Vrms |
| Surge withstand voltage | $12,000 \mathrm{~V}$ (initial) |
| Coil voltage | (DC) $3,5,6,9,12,24 \mathrm{~V}$ |
| Coil power | $200 \mathrm{~mW} / 400 \mathrm{~mW}$ |
| Mounting method | Print |
| Ambient temperature | $-40^{\circ} \mathrm{C} \mathrm{to}+85^{\circ} \mathrm{C}$ <br> $\left(-40^{\circ} \mathrm{Fto}+185^{\circ} \mathrm{F}\right)$ |

Internal structure of a relay

Typical applications

White goods

Smart metering

Home automation

DE series: Compact relays

Size in mm: $25 \times 12.5 \times 12.5(\mathrm{~L} \times W \times H)$

## Miniature polarized 8A/10A power relay

> Low coil power
> High switching capacity: $16 \mathrm{~A}=25,000$; $10 A=100,000$ switching cycles

〉 Creepage and clearance distance: min. 8mm
> Mounting method: PCB
> Conforms to European safety standards: EN60730 and EN60335

| Switching current | Max: 8A (1a1b, 2a) ; 10/16A (1a) |
| :---: | :---: |
| Max. switching voltage | 230V DC; 440V AC |
| Contact arrangement | 1a, 1a1b, 2a |
| Breakdown voltage between open contacts | 1000Vrms |
| Breakdown voltage between contact sets | 4000Vrms (1a1b, 2a) |
| Breakdown voltage between contacts and coil | 5000Vrms |
| Surge withstand voltage | 12,000V |
| Coil voltage | (DC) 1.5, 3, 4.5, 5, 6, 9, 12, 24, 48V |
| Coil power | Single side stable: 200 mW <br> 1 coil latching: 100 mW <br> 2 coil latching: 200 mW |
| Ambient temperature | $-40^{\circ} \mathrm{C}$ to $+70^{\circ} \mathrm{C}\left(-40^{\circ} \mathrm{F}\right.$ to $\left.+158^{\circ} \mathrm{F}\right)$ |

DJ series: High-current switching relays

Size in mm: $29 \times 13 \times 16(\mathrm{LxW} \times H)$

Compact polarized with high capacity power relay 16A up to 20A*
) Latching type available
) Low coil power
) Optional available with manual test button
) Creepage and clearance distance: min. 8 mm
》 Mounting method: PCB

| Switching current | Max: 16A, up to 20A |
| :--- | :--- |
| Max. switching voltage | 125 V DC; 400V AC |
| Contact arrangement | $1 \mathrm{a}, 1 \mathrm{~b}, 1 \mathrm{c}, 1 \mathrm{a1b}, 2 \mathrm{a}, 2 \mathrm{~b}, 2 \mathrm{c}$ |
| Breakdown voltage between <br> open contacts | 1000 Vrms |
| Breakdown voltage between <br> contacts and coil | 4000 Vrms |
| Surge withstand voltage | $10,000 \mathrm{~V}$ |
| Coil voltage | (DC) $5,6,12,24,48 \mathrm{~V}$ |
| Coil power | Single side stable: 250 mW <br> 1 coil latching: 150 mW <br> $2 ~ c o i l ~ l a t c h i n g: ~$ |
| Ambient temperature | $-40^{\circ} \mathrm{C}$ to $+70^{\circ} \mathrm{C}\left(-40^{\circ} \mathrm{F}\right.$ to $\left.+158^{\circ} \mathrm{F}\right)$ |

* 20A acceptable under certain conditions (please consult us)

## Typical applications

Smart metering

Home automation

Typical applications

PF series：Slim 6A relay

## Very slim type relays with high power capacity

）Optimized lifetime
）Slim size with wide switching capacity
）High surge voltage（6000V）and high breakdown voltage（4000V）
）Insulation construction conforms to VDE0700
）Contacts with silver nickel or silver nickel gold－clad （also available with AgSnO 2 contact material）
）Clearance／creepage distance min． $5.5 \mathrm{~mm} / 8 \mathrm{~mm}$

| Switching current | $6 \mathrm{~A}\left(\mathrm{up}\right.$ to $\left.8 \mathrm{~A}^{\star}\right)$ |
| :--- | :--- |
| Max．switching voltage | 300 V DC； 400 V AC |
| Contact arrangement | $1 \mathrm{a}, 1 \mathrm{c}$ |
| Breakdown voltage <br> between open contacts | 1000 Vrms |
| Breakdown voltage <br> between contacts and coil | 4000 Vrms |
| Surge withstand voltage | 6000 V |
| Coil voltage | $(\mathrm{DC}) 4.5,5,6,12,18,24,48,60 \mathrm{~V}$ |
| Coil power | $170 \mathrm{~mW}(5 \mathrm{to} \mathrm{24V})$ <br>  <br> Mounting method <br> Ambient temperature |
|  | PCB |

＊8A 277V AC General use（UL，C－UL，File No．E120782）
8A 250V AC（VDE File No．40027672）

AGN／AGQ series

## Very slim or flat signal relay

〉 Nominal operating power of 100 mW available
）Sealed according to RTIII（IP67）
）Increased packaging density
〉 Mounting method：PCB，SMT
》 Twin crossbar contacts ensure high contact reliability
）Stationary contact：AgPd＋Au clad movable contact：AgPd

| Switching current | Max：2A；min： $10 \mu \mathrm{~A}$ |
| :---: | :---: |
| Max．switching voltage | 110V DC；125V AC |
| Contact arrangement | 2c |
| Breakdown voltage between open contacts | 750Vrms |
| Breakdown voltage between contact sets | 1000Vrms |
| Breakdown voltage between contacts and coil | 1500Vrms |
| Surge withstand voltage | 1500V FCC；2500V Bellcore（Telcordia） |
| Coil voltage | 1．5，3，4．5，6，9，12， 24 V |
| Coil power | Single side stable standard： 140 mW （ 1.5 to 12 V DC ）； 230mW（24V DC） <br> Single side stable sensitive： 100 mW （ 1.5 to 12 V DC）； 120 mW （24V DC） $\qquad$ |
| Ambient temperature | （Single side stable， 1 coil latching type）$-40^{\circ} \mathrm{C}$ to $+85^{\circ} \mathrm{C}\left(-40^{\circ} \mathrm{F}\right.$ to $\left.+185^{\circ} \mathrm{F}\right)$ （High sensitivity single side stable type）$-40^{\circ} \mathrm{C}$ to $+70^{\circ} \mathrm{C}\left(-40^{\circ} \mathrm{F}\right.$ to $\left.+158^{\circ} \mathrm{F}\right)$ |

## Typical applications

## Typical applications

 power applicationsHE-Y6: Smallest 90A in the market

Size in mm: $33 \times 38 \times 38.8(\mathrm{LxW} \times H)$

## Advanced power range for relays

) High capacity switching 90A 277V AC
) Compact size W:38x L:33 x H:38,8mm
) Energy efficiency by coil holding power of 310 mW only
) Contact gap of $3,0 \mathrm{~mm}$
) Mounting method: PCB

| Switching current | $90 \mathrm{AAC}, 60 \mathrm{~A} \mathrm{DC}$ |
| :--- | :--- |
| Max. switching voltage | $277 \mathrm{~V} \mathrm{AC}, 60 \mathrm{~V}$ DC |
| Contact arrangement | 1 a |
| Breakdown voltage between <br> open contacts | 2000 Vrms |
| Breakdown voltage between <br> contacts and coil | 5000 Vrms |
| Surge withstand voltage | $10,000 \mathrm{~V}$ |
| Coil voltage | $(\mathrm{DC}) 6,9,12,24 \mathrm{~V}$ |
| Coil power | $1,920 \mathrm{~W}(\mathrm{holding}$ power: 310 mW$)$ |
| Mounting method | PCB |
| Ambient temperature | $-40^{\circ} \mathrm{C}$ to $+85^{\circ} \mathrm{C}\left(-40^{\circ} \mathrm{F}\right.$ to $\left.\left.+185^{\circ} \mathrm{F}\right)\right)$ |

PAN- 5A: Relay at 5 mm width

Size in mm: $20 \times 5 \times 12.5(\mathrm{LxW} \times H)$

## Reinforced insulation for PLC and interface modules

) Strong electrical endurance for various loads (resistive, inductive, capacitive)
) Smallest size W: $5 \times \mathrm{L}: 20 \times \mathrm{H}: 12.5 \mathrm{~mm}$ (bent pin version 5 mm height possible)
》 Reinforced insulation acc. to IEC 61010-1 by clearance of $5,29 \mathrm{~mm}$ and creepage of $5,35 \mathrm{~mm}$
) Sealed construction complies with standards for Hazardous locations (ATEX)

| Switching current | $5 \mathrm{~A}(\mathrm{AC}) ; 5 \mathrm{~A}(\mathrm{DC})$ |
| :--- | :--- |
| Max. switching voltage | $110 \mathrm{VDC} ; 250 \mathrm{VAC}$ |
| Contact arrangement | 1 a |
| Breakdown voltage between <br> open contacts | 1000 Vrms (Form A contacts) |
| Breakdown voltage between <br> contacts and coil | 3000 Vrms (Form A contact and coil) |
| Surge withstand voltage | 6000 V |
| Coil voltage | (DC) $3 ; 4,5 ; 5 ; 6 ; 9 ; 12 ; 18 ; 24 \mathrm{~V}$ |
| Coil power | 110 mW |
| Ambient temperature | $-40^{\circ} \mathrm{C} \mathrm{to}+90^{\circ} \mathrm{C} \quad\left(-40^{\circ} \mathrm{Fto}+194^{\circ} \mathrm{F}\right)$ |

## Typical applications

Charging station

Typical applications

PLC I/O modules

Interface modules
 applications by be
pin version

DJ－H：50A relay dedicated for high inrush currents（EN 60669－1）

Size in mm： $39 \times 15 \times 33$（LxWxH）

## Latching relay including manual lever

）High－capacity switching 50A 277V AC 10.000 switching cycles
）Capable of handling inrush currents up to 600A for loads like $200 \mu \mathrm{~F}$ 20A acc．to EN 60669－1
，Compact size
＞Reinforced insulation：Clearance／creepage distances btw．coil／ contact＞ 10 mm
）Activation power 1W only（latching）

| Switching current | 50 A |
| :--- | :--- |
| Max．switching voltage | 480 V AC |
| Contact arrangement | 1 a |
| Breakdown voltage between <br> open contacts | 1500 Vrms |
| Breakdown voltage between <br> contacts and coil | 4000 Vrms |
| Surge withstand voltage | $12,000 \mathrm{~V}$ |
| Coil voltage | $5,6,9,12,24 \mathrm{~V}(\mathrm{DC})$ |
| Coil power | 1 coil latching： 1 W <br> 2 coil latching： 2 W |
| Ambient temperature | $-40^{\circ} \mathrm{C}$ to $+85^{\circ} \mathrm{C}\left(-40^{\circ} \mathrm{F}\right.$ to $\left.+185^{\circ} \mathrm{F}\right)$ |

## Typical applications

Lighting applications in the IOT

HE－S：2FormA 35A rating at smallest package size

Size in mm： $36 \times 30 \times 40(L \times W \times H)$

## The first power relay which integrates safety by feedback contact mechanism

》 High－capacity and long life 35A 277V AC 50.000 switching cycles
＞Compact size
〉 Integrated safety by mirror contact mechanisms acc．to EN60947－4－1

》 Energy efficiency by coil holding power of 170 mW only
〉 Contact gap： 3.2 mm（VDE0126 compliant）

| Switching current | 35 A for each contact（AC），30A DC |
| :--- | :--- |
| Max．switching voltage | 300 V DC contacts in series； <br> 480 V AC |
| Contact arrangement | $2 \mathrm{a}, 2 \mathrm{a} 1 \mathrm{~b}$ |
| Breakdown voltage between <br> open contacts | 2000 Vrms （Form A contacts） |
| Breakdown voltage between <br> contacts and coil | 5000 Vrms （Form A contact and coil） |
| Surge withstand voltage | $10,000 \mathrm{~V}$ |
| Coil voltage | $(\mathrm{DC}) 5,6,9,12,24,48 \mathrm{~V}$ |
| Coil power | $1880 \mathrm{~mW}($ holding power： 170 mW$)$ |
| Ambient temperature | $-40^{\circ} \mathrm{C} \mathrm{to}+85^{\circ} \mathrm{C}\left(-40^{\circ} \mathrm{F}\right.$ to $\left.+185^{\circ} \mathrm{F}\right)$ |

Typical applications

SF-Y series: Compact, flat relays with forcibly guided contacts

Size in mm: $31 / 39 \times 28.6 \times 14.5(\mathrm{LxWxH})$

## Approvals: EN61810-1, EN50205, EN50178

) Reinforced insulation
) Available as 4-pole and 6-pole types with various contact arrangements
) Gold-clad contacts available upon request
> Polarized rotating armature for low nominal operating power and high shock and vibration resistance

| Switching current | Max.: 6A; min.: 1 mA |
| :--- | :--- |
| Max. switching voltage | 30 V DC; 250V AC |
| Contact arrangement | 2a2b, 3a1b, 4a2b, 5a1b |
| Breakdown voltage between <br> open contacts | 1500 Vrms |
| Breakdown voltage between <br> contact sets | 4000 Vrms |
| Breakdown voltage between <br> contacts and coil | $4000 \mathrm{Vrms}, 2500 \mathrm{Vrms}$ |
| Coil voltage | (DC) 5, 12, 18, 21, 24 |
| Coil power | 670 mW |
| Mounting method | PCB |
| Ambient temperature | $-40^{\circ} \mathrm{C}$ to $+70^{\circ} \mathrm{C} \quad\left(-40^{\circ} \mathrm{F}\right.$ to $\left.+158^{\circ} \mathrm{F}\right)$, <br> $+85^{\circ} \mathrm{C}$ on request |

EP series: High capacity DC cut-off relays

Size in mm (80A type): $79 \times 75.5 \times 40$ (LxWxH)

High capacity of max. 1000V DC cut-off possible
) High capacity to cut off DC voltage in a compact relay: max. cut-off current 2500A/300V DC (300A)
) Nominal switching capacity (300A 400V DC)
) Low operating noise
》 High contact reliability
》 DC type with sealed capsule and arc-space-free construction

| Max. switching voltage | 400 V DC |
| :--- | :--- |
| Switching capability (1a) | Max: from 10A to 300A; min: 1A |
| Breakdown voltage between <br> open contacts | 2500 Vrms |
| Breakdown voltage between <br> contacts and coil | 2500 Vrms |
| Coil voltage | (DC) $12,24,48,100 \mathrm{~V}$ |
| Coil power | From 1.4 W to $4.5 \mathrm{~W}(10 \mathrm{~A} . .80 \mathrm{~A})$ <br> $300 \mathrm{~A}: 45 \mathrm{~W}$ then $4 \mathrm{~W}($ after 100ms $)$ |
| Mounting method | Screw terminal |
| Ambient temperature | $-40^{\circ} \mathrm{C}$ to $+80^{\circ} \mathrm{C}\left(-40^{\circ} \mathrm{F}\right.$ to $\left.+176^{\circ} \mathrm{F}\right)$ |

## Typical applications

Typical applications

Battery charge and discharge control

Electric vehicle Electric vehicle
charging station

Printed circuit board relays

## Silent type

for quiet operation

## Twin type

for motor reversing application

Single type
for various applications

Panasonic has been contributing to the ever increasing need for innovation in transportation electronics for decades, with highly reliable, long lasting devices for safety, comfort, entertainment and powertrain applications.

Presenting a broad range of automotive PC board relays Panasonic can offer a suitable and cost efficient switching solution for almost any application.
) Nominal currents up to 70A
> Twin relays as 10-pin type or as 8-pin type (integrated H-bridge) for motor reversing applications
> Types with Pin-in-Paste (PIP) or SMD mounting are available
> Flat or slim types for space saving applications
> TC relay as latching type available
> Special silent relays with extremely low sound pressure

## EV series: Relays for hybrid and electric vehicles

Panasonic Electric Works' EV relay series can already be found in several million vehicles on the streets of Asia, America and Europe. These relays are optimized for each application, come in several shapes and sizes and cover all performance classes. Panasonic has developed new types with more than 6000A short circuit capability without electromagnetic repulsion. This adds more safety to the system in case extreme short circuit current has to be cut-off by the fuse.

## High carrying and cut-off performance

Nominal currents up to 300A
New high short circuit types (without electromagnetic repulsion)
Plug-in types for faster assembly
Silent types for quiet operation
Several customizations possible (mounting position, coil connector, contact material...)

Pre-charge relay

DC-charger relay (Normal or fast charge)

Maintenance switch (SDS)

Battery disconnect relays

Relay for auxilliary applications) (Aircondition, heater, DC/AC converter, etc.)

## Mode of operation

EV relay internal view

The arc is pulled towards the wall by permanent magnet

## Introduction to PhotoMOS and Solid State Relays

## What makes PhotoMOS relays so successful？

Modern semiconductor technology enables fast，quiet，bounce－free switching，even in miniature sizes．PhotoMOS relays nevertheless enjoy an almost unlimited lifetime if used according to the specifications． Moreover，they are extremely reliable，unaffected by vibrations，and their ON－resistance remains stable throughout their entire lifetime．

The most important advantages at a glance
）Galvanic I／O isolation
）Linear output characteristics
》 No threshold voltage
Low operate current（sensitive type $\leq 0.31 \mathrm{~mA}$ ）
）Low output capacitance（RF type $\leq 1 p F$ ）
）Absolute minimum leakage current（ pA ）
）Extremely long lifetime
）Stable ON－resistance over the entire lifetime
》 Extremely compact design（VSSOP，SON，SSOP，SOP）
》 No contact bounce
）Highly resistant to shock and vibration
）Flexible mounting orientation

## Smartphone App：

A clear and straight－ forward navigation with three different search options helps you to find the best PhotoMOS for your application．

Various packages available

PhotoMOS technology

## AQY2C1R6P / AQY2C1R2P / AQY2C2R2P series:

Capacitive coupled MOSFET Relay

Size in $m m: 1.8 \times 1.95 \times 0.8 \mathrm{~mm}(\mathrm{LxW} \mathrm{xH})$

## Ultraminiature PhotoMOS relay with Iow CxR MOSFETS on the output

) Operating temperature max. $+105^{\circ} \mathrm{C}$
> Low input current of max. 0,2 mA
> Control by $\mu$ Controller directly due to voltage mode (3-5V)
> On-/Off times in the range of $\mu \mathrm{S}$
》 Very compact TSON package

| Item | Symbol | AQY2C1R6P | AQY2C1R2P | AQY2C2R2P |
| :---: | :---: | :---: | :---: | :---: |
| Output configuration |  | 1 Form A |  |  |
| Input voltage | $V_{\text {IN }}$ | 3~5V |  |  |
| Load voltage | $V_{\text {L }}$ | 30 V | 40 V | 60 V |
| Load current | $\mathrm{I}_{\mathrm{L}}$ | 0.75A | 0.3A | 0.3A |
| I/O isolation voltage | $V_{\text {iso }}$ | 200 V AC |  |  |
| Operating temperature | $\mathrm{T}_{\text {opr }}$ | $-40^{\circ} \mathrm{C} \sim+105^{\circ} \mathrm{C}$ |  |  |
| Storage temperature | $\mathrm{T}_{\text {str }}$ | $-40^{\circ} \mathrm{C} \sim+125^{\circ} \mathrm{C}$ |  |  |
| Operate voltage | $V_{\text {Fon }}$ | Typ. 1.7V | Typ. 1.8V | Typ. 1.6V |
| Input current at $\mathrm{V}_{\mathbb{1 N}}=3.3 \mathrm{~V}$ | $\mathrm{I}_{\text {IN }}$ | Max.0.1mA |  |  |
| Input current at $\mathrm{V}_{\text {IN }}=5 \mathrm{~V}$ | $\mathrm{I}_{\text {IN }}$ | Max.0.2mA |  |  |
| On resistance at $\mathrm{V}_{\mathrm{IN}}=3.3 \mathrm{~V}$ | $\mathrm{R}_{\text {on }}$ | Typ.0.22ת | Typ.0.9 | Typ. $1 \Omega$ |
| Output capacitance | $\mathrm{C}_{\text {out }}$ | Typ. 40pF | Typ. 14.5pF | Typ. 27pF |
| Leakage current | $\mathrm{I}_{\text {Leak }}$ | Max. 10nA | Max. 10nA | Max. 10nA |
| Turn on time at $\mathrm{V}_{\text {IN }}=3.3 \mathrm{~V}$ | $\mathrm{T}_{\text {on }}$ | Typ. 0.25ms | Typ. 0.15 ms | Typ. 0.18ms |
| Turn off time at $\mathrm{V}_{\mathbb{1}}=3.3 \mathrm{~V}$ | $\mathrm{T}_{\text {off }}$ | Typ. 0.06ms | Typ. 0.04 ms | Typ. 0.06ms |

## Typical applications

APS1551S: High Speed Photo IC coupler

Size in mm: $4.4 \times 4.3 \times 2.1 \mathrm{~mm}(\mathrm{LxWxH})$

## Up to 50 MBd switching speed

) Operating temperature max. $+105^{\circ} \mathrm{C}$
〉 Common mode transient rejection (CMTR) min. $15 \mathrm{kV} / \mathrm{\mu s}$
) Compact 5-pin SOP6 package
) Isolation voltage: 3750 Vrms
) Totem pole output type

| Package | 5-pin SOP6 $(6.8 \times 4.3 \times 2.1 \mathrm{~mm})$ |
| :--- | :--- |
| Switching speed (standard) | Typ. 50 MBd |
| Common mode transient <br> immunity (CMTI) | Min. $15 \mathrm{kV} / \mathrm{us}$ |
| Operating temperature | -40 to $105^{\circ} \mathrm{C}$ |
| Power supply voltage | 4.5 to 5.5 V |
| Input current | 10 to 16 mA |
| Supply current (current consumption) | Max. 5 mA |
| Propagation delay time | Max. 30 ns |
| Pulse width distortion | Max. 10 ns |
| Isolation voltage | Min. 3750 Vrms |

Typical applications

PLC

Measurement market
 infrastructure

ASQ Mini: Turquoise stroke mini switches

Size in mm: $8.3 \times 5.3 \times 7.85(\mathrm{LxW} \times H)$

## Smallest size in IP67

》 Miniaturization achieved with changing from 1 Form C to 1 Form A or 1 Form B contacts. (For the terminal type, volume has been cut 45\% compared to our previous product.)
) Lever installation possible while being miniature. Operation possible in various moving parts such as metal cams.
) Contact pressure does not depend on the operation stroke
) High contact reliability to support low level switching loads
) Highly effective sealing for resistance against adverse environments (IP67)
) Silent operation with sliding contact

| Electrical switching life | 5 VDC 1 mA (resistive load): <br> $\mathrm{min} .3 \times 10^{5}$ <br> $12 \mathrm{VDC} \mathrm{50mA}$ (resistive load): <br> $\min .2 \times 10^{5}$ <br> 16 VDC 50 mA (resistive load): <br> min. $1.5 \times 105$ |
| :--- | :--- |
| Switching frequency | 20 times/min |
| Pushbutton operation speed | 30 to $500 \mathrm{~mm} / \mathrm{s}$ |
| Degree of protection | $I P 67$ |

Actuator type: Operating force, max.:

| Pin plunger | 1.2 N |
| :--- | :--- |
| Simulated roller lever | 1.5 N |

ASQM fork shape: For press fit

Size in mm: $8.3 \times 5.3 \times 7.85(\mathrm{LxWxH})$

## Solderless connection

) ASQM with fork shape
> Press fit solution
> Contributes to a time and cost-efficient production process

| Electrical switching life | 5 VDC 1 mA (resistive load): <br>  <br>  <br>  <br>  <br>  <br>  <br> $12 \mathrm{Vin} .3 \times 10^{5}$ <br> $\mathrm{~min} .2 \times 10^{5} \mathrm{~mA}$ (resistive load): <br> 16 VDC 50 mA (resistive load): <br> $\mathrm{min} .1 .5 \times 105$ |
| :--- | :--- |
| Switching frequency | 20 times $/ \mathrm{min}$ |
| Pushbutton operation speed | 30 to $500 \mathrm{~mm} / \mathrm{s}$ |
| Degree of protection | IP67 |

Actuator type: Operating force, max.:

| Pin plunger | 1.2 N |
| :--- | :--- |
| Simulated roller lever | 1.5 N |

## Typical applications

ASQ series: Sliding contact construction

Size in mm: $13.3 \times 5.4 \times 10.1$ ( LxWxH )
Highly resistant to harsh environments, suitable for all markets
) Tightness class conforming to IP67
) High contact reliability thanks to double-sided sliding \& gold-plated contact
》 Ultra long stroke of 2.5 mm for NC contact
) Stable contact pressure without bouncing
) No operational click sound by sliding contact
》 Direct lateral actuation of the pin plunger

| Electrical switching life | 5 VDC 1 mA (resistive load): <br> $\mathrm{min} .5 \times 10^{5}$ <br> $16 \mathrm{~V} \mathrm{DC} \mathrm{50mA} \mathrm{(resistive} \mathrm{load):}$ <br> $\mathrm{~min} .5 \times 10^{5}$ <br> $30 \mathrm{~V} \mathrm{DC} \mathrm{100mA}$ (resistive load): <br> $\mathrm{min} .2 \times 10^{5}$ |
| :--- | :--- |
| Switching frequency | 20 times $/ \mathrm{min}$. |
| Pushbutton operation speed | 30 to $500 \mathrm{~mm} / \mathrm{s}$ |
| Degree of protection | IP67 |

## Working principle

NC contact

T-Series: Including toggle-, rocker- and push button switches

## With new UL61058

) Sealed types available
) Portfolio includes up to 4-pole type
) Momentary and alternate function
) Various terminal types make installation easy
) Accessories for custom needs

| Switching capacity: | Up to 15A/250V AC <br> $15 A / 30 V D C$ |
| :--- | :--- |
| Inrush current: | 40A max. |
| Degree of protection: | up to IP67 |

## Customized solutions

Please consult us for customized solutions:
Wire cutting, wire welding, hot melt potting, contact crimping, over molding, $100 \%$ end
 test, marking \& packing.

## Typical applications

Typical applications

Forklift

Good lifts
Agriculture devices

## EKMB

Plug \& Sense PIR

detailed specification

## * For own lens design or pin-hole lens application

Pin-hole Iens application example

## Typical applications

FPC connectors：Back lock type

## Designed for space saving applications

＞Mechanical design freedom is achieved with double top and bottom contacts

》 Wiring patterns can be placed underneath the connector
〉 Easy－to－handle back lock design
〉 Man－hours of assembly time can be reduced by delivering the connectors with their levers opened

》 Nickel barrier helps resist solder creepage
〉 FPC holding contacts available

| Usage | FPC |
| :--- | :--- |
| Pitch | 0.2 mm to 0.5 mm |
| Mated height | 0.6 mm to 1.0 mm |
| Lock structure | Back lock |
| Applicable FPC thickness | $0.2 \mathrm{~mm} / 0.3 \mathrm{~mm}$ |
| Specification | Top and bottom double contact <br> $($ except Y3BL） |
| Terminal capability | 0.2 A to $0,5 \mathrm{~A}$ terminal |
| Number of pin contacts | 2 to 71 |
| Ambient temperature | $-55^{\circ} \mathrm{C}$ to $+85^{\circ} \mathrm{C}$ |
| Insertion and removal life | 20 times |

## Narrow pitch connectors：

For Board to FPC／Board to Board

## TOUEHEDNTHET

## Panasonic＇s proprietary pattern

》 High resistance to various environments
》 Simple lock structure provides tactile feedback to ensure excellent mating／unmating operation feel

》 Gull－wing－shaped terminals to facilitate visual inspections
＞Connectors for use in test adapters or inspection equipment available
＞Stacking connector series for high currents up to 10A

| Usage | Board to FPC／Board to Board |
| :--- | :--- |
| Pitch | 0.35 mm to 0.5 mm |
| Mated height | 0.6 to 9 mm |
| Specification | Ultra－slim body |
| Terminal capability | 0.25 A to $0.5 \mathrm{~A} /$ terminal |
| Number of pin contacts | 6 to 100 |
| Ambient temperature | $-55^{\circ} \mathrm{C}$ to $+85^{\circ} \mathrm{C}$ |
| Insertion and removal life | Min． 30 times |

Typical applications

Keyboard

Typical applications

Active Optical Connector：V－Series

High－speed optical transmission by electrical connector
，Structure of electric－optic conversion inside the plug
》 Bi－directional high speed and wideband data transmission
》 Excellent noise reduction and electrical isolation
〉 Easy to handle by electrical connector
）Suitable for small equipment by compact design

| Channel | Bi －direction $\cdot 1 \mathrm{ch}$ |
| :--- | :--- |
| Fiber length | $50 \mathrm{~mm}, 300 \mathrm{~mm}, 1 \mathrm{~m}$ |
| Transmission rate | $20 \mathrm{Mbit} / \mathrm{s}$ to 6 Gbps <br> （max．10Gbps） |
| Supply voltage | 3.3 VDC |
| Power consumption | Max． 230 mW |
| Operating temperature | 0 to $70^{\circ} \mathrm{C}$ |

## Connector with E／O Converter

Typical applications

Typical applications

Good lifts

Stacking connector：BO2－series for high current

）High current rating：10．0 A （5．0 A／pin $\times 2$ pin）
）High reliability in low profile of 0.7 mm
＞ 4 signal terminals
》 High removal force

| Usage | Board to FPC／Board to Board |
| :--- | :--- |
| Mated height | 0.7 mm |
| Number of pin contacts | 4 pins power terminal <br> 4 pins signal terminal |
| Rated voltage | $30 \mathrm{~V} \mathrm{AC/DC}$ |
| Rated current | $5.0 \mathrm{~A} /$ pin（Power contact） <br> $0.3 \mathrm{~A} /$ pin（Signal contact） |
| Contact resistance | Power contact：max 16m <br> Signal contact：max． $90 \mathrm{~m} \Omega$ |
| Removal force | Min． 10 N |
| Ambient temperature | $-55^{\circ} \mathrm{C}$ to $+85^{\circ} \mathrm{C}$ |
| Insertion and removal life | 30 times |

FPC connector：Y4BH－series：

## Impedance matching type

）Compact design with 0.4 mm pitch and 1.0 mm height
）Suitable for high－speed transmission up to 10Gbps
》 Enable flexible circuit design
，Back－lock design
》 Delivered with the levers opened

| Usage | FPC |
| :--- | :--- |
| Mated height | 1 mm |
| Number of pin contacts | 40,50 |
| Rated voltage | 50 V AC／DC |
| Rated current | $0.3 \mathrm{~A} / \mathrm{pin}$ |
| Contact resistance | $100 \mathrm{~m} \Omega$ |
| Impedance | $85 / 90 \Omega \pm 10 \Omega / 100 \Omega \pm 15 \Omega$ |
| Applicable FPC thickness | 0.3 mm |
| Ambient temperature | $-55^{\circ} \mathrm{C}$ to $+85^{\circ} \mathrm{C}$ |
| Insertion and removal life | 20 times |

Typical applications

Typical applications

Tough Contact technology

## TロLGHLDNTFIT

An area where the nickel-plated layer is exposed has been secured in the middle of the socket contact. This area prevents solder rise, to which conventional ultra-low-profile connectors are prone.
> Influence of solder controlled in contact and contact spring parts.
) Solder remains in the terminals and a stable fillet mold is possible.

The two-point contact structure provides high contact reliability even though the profile is ultra-low at 0.6 mm . The structure blocks flux and foreign substances with an effect equivalent to that of our unique V-notch structure

The simple lock structure gives tactile feedback that ensures a superior mating/ unmating operation feel

MIPTEC technology

3D fine pattern
3D fine patterning is achieved by the high accuracy laser processing technology (circuit width/distance between circuit $=50 \mu \mathrm{~m} / 50 \mu \mathrm{~m}$, molded component pattern accuracy $\pm 30 \mu \mathrm{~m}$ ).

## Direct bare chip mounting

Direct mounting of chips is achieved with a resin material featuring a low linear expansion coefficient. Combined with a surface activation technology, this ensures smoothness of circuit surfaces.

## Ceramic MID

Capable of forming 3D fine patterns on surfaces made of ceramic as well as resin. High mounting reliability (low coefficient of linear expansion), high thermal resistance/high heat dissipation, good high-frequency characteristics.

3D fine pattern

Direct bare chip mounting

Ceramic MID
