EPO-TEK[®] 301

For Reference Only

Spectrally Transparent Epoxy

Number of Components: Mix Ratio By Weight:	Two 20:5	Recommended Cure: 65°C	2 Hours	
Specific Gravity:		Minimum Alternative C	Minimum Alternative Cure(s):	
Part A	1.15	Note: May not achieve	performance properties below	
Part B	0.87	65°C	1 Hour	
Pot Life:	1 - 2 Hours	23°C	24 Hours	
Shelf Life:	One year at room temperature			
Note: Containar(s) should be kept closed when not in use. Filled systems should be stirred thereughly before mixing and prior to use				

Note: Container(s) should be kept closed when not in use. Filled systems should be stirred thoroughly before mixing and prior to - MIXED VOLUME SHOULD NOT EXCEED 25 GRAMS -

Product Description:

EPO-TEK[®] 301 is a two component, room temperature curing epoxy featuring very low viscosity, and excellent optical-mechanical properties.

EPO-TEK[®] 301 Advantages & Suggested Application Notes:

- Semiconductor: optical glob top or underfill; adhesion to common wafer passivation, solder mask and flex circuits; compatible with LED die, Si, GaAs.
- PCB: general potting and protection over FR4, flex, or ceramic PCBs.
- Medical:
 - It is NONTOXIC—complying with USP Class VI Biocompatibility standards. Suggested for medical devices such as catheters, hand and tooling, dental, and endoscopic products; adhesion to stainless steel, titanium, and most plastics; resisting sterilizing techniques like ETO, gamma, and autoclave (65°C/1 hour cure); resisting X-ray radiation; potting and protection of scintillator crystals; CT Detector packaging; adhesive for the optical beam pathway in photo-diode arrays.
 - Compatible with CIDEX® OPA sterilization.
- Fiber Optic: adhesive for glass and plastic fibers; wicking into fiber bundles used in patch cords, endoscopes or sensor devices; adhesive/seal/encapsulant used for fiber packaging and components; transmission of IR up to 2500 nm; terminating fibers into ferrules; fiber coupling and splicing.
- Opto-electronic;
 - LCD/LED adhesive for laminating glass layers; adhesion to PET plastic; general potting, encapsulation, and protection; spectral transmission in VIS and IR light; adhesive/encapsulant for VCSEL's packaged devices; resisting yellowing per ASTM D1925; adhesive for precision optics including lens, prism, beam splitter cubes, mirrors, and diodes, found in medical, university, or research communities.
- NASA approved, low outgassing epoxy <u>http://outgassing.nasa.gov/</u>

<u>Typical Properties</u>: (To be used as a guide only, not as a specification. Data below is not guaranteed. Different batches, conditions and applications yield differing results; Cure condition: varies as required; * denotes test on lot acceptance basis)
