Industrial COTS Test COMM Broadcast

The FPS1000 AC-DC industrial power supplies can be operated in a hot-swap redundant configuration, or used to provide up to 3,000W of bulk power. Up to three power supplies can be fitted in a variety of 19" 1U high racks, for configuration as a single, dual, or triple output. The FPS supplies have internal ORing diodes and current share for automatic parallel operation. Communication is possible with the power supplies using the optional isolated (I^2C) interface. AC fail, DC good, remote on/off and a 12V auxiliary output are fitted as standard.

Features	Benefits
• 1U High	• Utilizes Less Rack Space
• Hotswap Capable	• Suitable for N+1 Redundancy
• High Efficiency	• Less Heat Dissipated in System
• Full Array of Signals	• Easier System Monitoring
