

DIN-Signal harbus64,C,F,PL1-5000 reel

| Part number | 02 05 000 1511 |
|--------------------|---------------------------------------|
| Specification | DIN-Signal harbus64,C,F,PL1-5000 reel |
| HARTING eCatalogue | https://b2b.harting.com/02050001511 |

Image is for illustration purposes only. Please refer to product description.

Identification

| Category | Contacts |
|-----------------|-------------------------|
| Series | har-bus [®] 64 |
| Type of contact | Crimp contact |
| Features | lead-free |

Version

| Gender | Female contact |
|-----------------------|---------------------------|
| Manufacturing process | Stamped contacts |
| Pack contents | 5000 bandoliered contacts |

Technical characteristics

| Conductor cross-section | 0.09 0.5 mm² |
|-------------------------|------------------------------|
| Conductor cross-section | AWG 28 AWG 20 |
| Wire outer diameter | 0.7 1.5 mm |
| Operating current | ≤1.5 A |
| Contact resistance | ≤20 mΩ |
| Stripping length | 3.5 4 mm |
| Performance level | 1 acc. to IEC 61076-4-113 |
| Mating cycles | ≥500 |
| | |

Material properties

Material (contacts)

Copper alloy

| Packaging size | 1 |
| Net weight | 1,200 g |
| Country of origin | Germany |
| European customs tariff number | 85366990 |

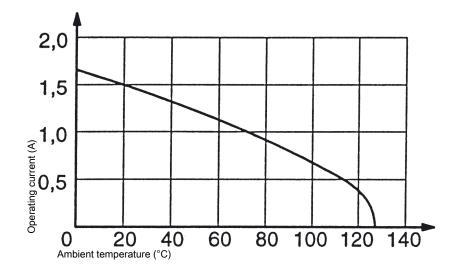

27440204 Contact for industrial connectors

Current carrying capacity

eCl@ss

The current carrying capacity of the connectors is limited by the thermal load capability of the contact element material including the connections and the insulating parts. The derating curve is therefore valid for currents which flow constantly (nonintermittent) through each contact element of the connector evenly, without exceeding the allowed maximum temperature.

Measuring and testing techniques acc. to IEC 60512-5-2

Installation of crimp contacts

Fitting the crimp contacts:

After crimping the wires onto the contacts with the help of a crimping tool or an automatic crimping machine the contacts should be correctly oriented and inserted into the cavities of the connector moulding in the required configuration. They snap into position and are firmly held in place. A light pull on the wire assures the correct tensile strength of the contact. When using stranded wires with a gauge below 0.37 mm² an insertion tool is necessary.Insertion tool part number: 09 99 000 0100

Insertion tool part number: 09 99 000 0100

Removing the crimp contacts:

The removal tool is inserted into a slot on the side of the respective crimp cavity. This action compresses the contact retaining spring therefore the contact can then be easily withdrawn using a light pull on the wire. This action will cause no damange to the contact / wire which can be repositioned / refitted as necessary. The drawing demonstrates the crimp removal procedure (max. 5x).

Removal tool part number: 09 99 000 0101
