INTEGRATION

Temperature Data Collection designed for the way YOU do business.

No matter the size of your company, TEGAM's flexible and customizable Developers' Kit will help you hit the ground running.

CALL TODAY 440-466-6100

Talk with an expert applications engineer
about your implementation.

OPTION 1

Developers' Kit

Created for the IT professional, deploying a custom software quality data management system.

- Source Code Example for WIN 10, WCF, iOS and Android™
- Control the user interface to minimize errors
- Link thermometry data to logistics, billing and inventory control software

Technical Support for your IT staff included*

*Developers' Kit is designed for qualified developers familiar with the selected platform. TEGAM will provide hardware and hardware-related programming support.

OPTION 2

Data Connector Utility

Temperature Traceability at Your Fingertips

The Data Connector is a ready-to-use system tray application that links your TEGAM 930-Series Data Thermometer and a Windows PC. Collect traceable temperature data on the factory floor, and effortlessly transfer it real-time to a PC, QMS, or other data management system. Each recorded measurement includes date / time stamp and the measured temperature.

- Connect your 930-Series Data Thermometer to a Windows PC quickly and easily
- Transmit traceable temperature measurement data to your enterprise QMS, corporate cloud server, or your PC
- Quality management controls built-in: Manage thermometer settings, data collection methods, and file management

As part of Developers' Kit, Data Connector source code is also provided. Use the utility as-is, or customize the utility to perfectly suit your needs.

DATA CONNECTOR

Data Integration for 930-Series Thermometers

REQUIREMENTS:

- TEGAM Developers' Kit
- Blue BLED112 Bluetooth Low Energy Adapter (included with Developers' Kit)
- Device running Windows 10, 8.1, or 7

OPTION 3

Out of the Box

No Developers' Kit needed – simply use the FREE Thermometer Link™ Mobile App and TEGAM Cloud™ database service. Simple to implement!

Data collection in 5 minutes!

- **STEP 1:** Download the App
- **STEP 2:** Create your TEGAM Cloud™ account at www.tegamcloud.com
- **STEP 3:** Pair Thermometer with the Device
- **STEP 4:** Press "DATA"

DATA COLLECTION IN 5 MINUTES!
