Precautions When Crimping

Required Documents Prior to Crimping

The work-related documents listed below are required before beginning cable assembly (The ● mark indicates required documents). Please contact a Hirose sales representative if you do not have these documents.

Document Title	Description	Automatic Crimping Machine	Hand Crimping Tool	Reference
1. Crimping Machine Main Unit Instruction Manual	Explanation of main press machine unit	●	-	Bundled with purchase of main press machine unit.
2. Applicator Instruction Manual	Crimping Method	●	-	Bundled with purchase of applicator.

6. Operating Instructions for Hand Tool	Crimping method, standard crimp height and tensile strength values	-	●	Bundled with purchase of hand tool.

Tools

Use the tools designated by Hirose when performing crimping. Crimping performed with tools other than those designated is outside the scope of warranty. The operating instruction manual for the crimping machine and applicator are provided. Be sure to carefully read the operating instructions before beginning work.

Applicable Cables

Check that the cables to be used are within the applicable range. If you intend to use a cable other than those recommended, contact a sales representative.

[Precautions]

- Cables applicable to crimping connectors are tin-plated stranded soft-copper wire.
- Avoid crimping solid wire, wires with polyester threads or tin coated wires.
- Avoid crimping two cables together.
- The crimp height setting values (Note) may vary between tin-plated and gold-plated terminals even if the same electric wires are used.
- The crimp height setting values (Note) may vary depending on the difference in the core wire configuration even if the computed cross-sectional area is the same.

Note : The crimp height is an important item that determines crimping quality. We execute crimping tests for each electric wire to ensure the optimal value for the crimp height with high precision, thereby ensuring optimal setup values.

Precautions

1.Cleaning Conditions	Please refer to the "Wire-to-Board Connector Use Handbook".
2.Connection Conditions	Please refer to the "Wire-to-Board Connector Use Handbook".
3.Precautions	<ul style="list-style-type: none"> ■ The color of the plastic molding may differ slightly depending on product lot and future storage conditions but this does not affect the product performance.
