

45 W QR USB PD adaptor reference design based on VIPERGAN50 and STUSB4761

Features

- Input voltage range: Universal AC from 90 to 264 VAC with 47 Hz to 63 Hz frequency
- Output voltage: 5 V, 9 V, 12 V, 15 V, 20 V
- Output current: 3 A @5 V, 9 V, 12 V, 15 V – 2.25 A @ 20 V
- Maximum output power: 45 W
- Efficiency standards: Meet CoC Tier 2 and DoE Level 6 efficiency requirements
- Peak efficiency: > 92 %
- Support for USB-PD, Type C output connector
- Meets IEC55022 Class B conducted EMI
- Key products: VIPerGaN50, STUSB4761, SRK1001

Application

- AC-DC smart chargers for smartphones, tablets, laptops and other handheld equipment

Description

The **EVLVIPGAN50PD** 45 W USB Type-C® Power Delivery 3.0 adapter is a USBPD reference design solution. It is an isolated power supply based on the **VIPERGAN50**, a new offline high-voltage converter from the VIPerPlus family with a 650 V HEMT Power GaN transistor, designed for quasi-resonant flyback converters, capable of providing an output power up to 50 W in wide range.

At the secondary side, to increase the system efficiency, the rectification is based on the **SRK1001** adaptive synchronous rectification controller.

Still on the secondary side, the CC/CV regulation loop to drive the power regulation stage and the USB Type-C® PD interface is based on the **STUSB4761** controller. This controller offers the benefits of a full hardware USB PD stack allowing robust, deterministic and safe negotiation in line with USB PD standard.

The evaluation board implements a robust adapter protected for output overvoltage, output undervoltage, output over power and output short-circuit. This reference design, based on STMicroelectronics semiconductors, helps designers to develop adapters with a short bill of materials to obtain a cost-effective and fast design.
