THC63LVD1027

Dual Link LVDS Repeater

General Description

The THC63LVD1027 LVDS(Low Voltage Differential Signaling) repeater is designed to support pixel data transmission between Host and Flat Panel Display up to WUXGA resolution.
THC63LVD1027 receives the dual link LVDS data streams and transmits the LVDS data through various line rate conversion modes, Dual Link Input / Dual Link Output, Single Link Input / Dual Link Output, and Dual Link Input / Single Link Output.

Features

- 30bits/pixel dual link LVDS Receiver
- 30bits/pixel dual Link LVDS Transmitter
- Operating Temperature Range : -40ºC~85ºC
- Wide LVDS input skew margin: ± 480ps at 75MHz
- Accurate LVDS output timing: ± 250ps at 75MHz
- Reduced swing LVDS output mode supported to suppress the system EMI
- Various line rate conversion modes supported
  Dual link input / Dual link output [clkout=1x clkin]
  Single link input / Dual link output [clkout=1/2x clkin]
  Dual link input / Single link output [clkout=2x clkin]
- Distribution (signal duplication) mode supported
- Power down mode supported
- 3.3V single voltage power supply
- No external components required for PLLs
- 64pin TSSOP with Exposed PAD (0.5mm lead pitch)

Mode Setting

Table 2. Mode Setting

Input/Output	RCLK2+/-	MODE1 (Input mode) H: Single L: Dual	MODE0 (Output mode) H: Single L: Dual
Dual-In/Dual-Out (Fig.3-1,14-1)	CLK in	L	L
Distribution (Fig.3-2,14-2)	Hi-Z	L	L
Single-In/Dual-Out (Fig.3-3,14-3)	Hi-Z	H	L
Dual-In/Single-Out (Fig.3-4,14-4)	CLK in	L	H
Reserved	-	H	H

Signal Flow for Each Setting

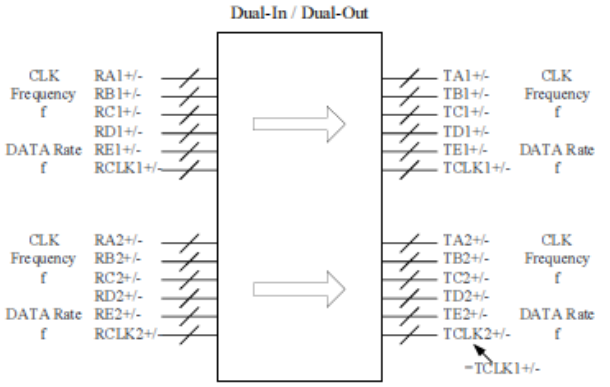

Figure 3-1

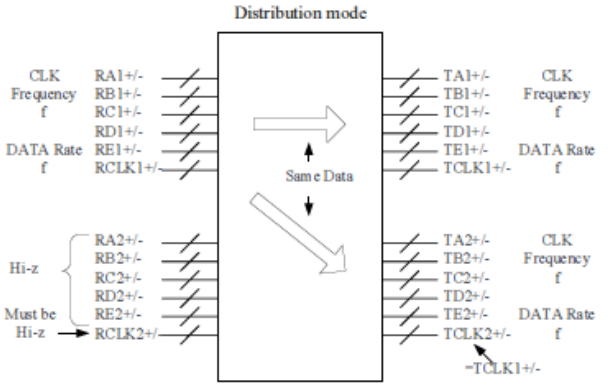

Figure 3-2

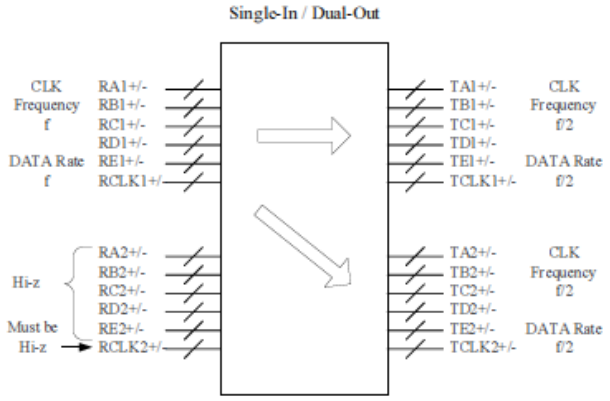

Figure 3-3

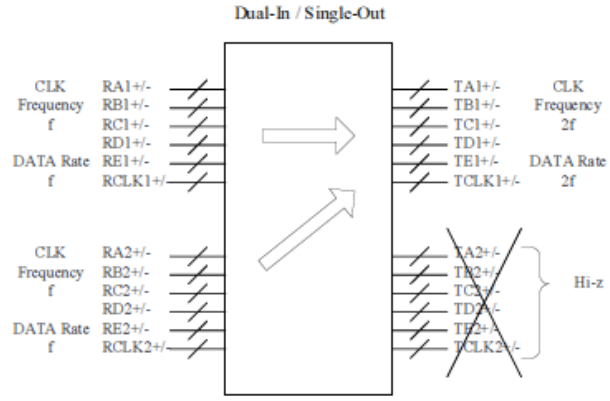

Figure 3-4

Output Control / Fail Safe

THC63LVD1027 has a function to control output depending on LVDS input condition.

Table 3. Output Control

PD	RCLK1+/-	RCLK2+/-	Output
L	*	*	All Hi-Z
H	Hi-Z	*	All Hi-Z
H	CLK in	CLK in	Refer to p.4 Mode Setting #
H	CLK in	Hi-Z	Refer to p.4 Mode Setting #

*: Don't care

#: If a particular input data pair is Hi-Z, the corresponding output data become L according to LVDS DC spec.

For fail-safe purpose, all LVDS input pins are connected to VDD via resistance for detecting Hi-Z state.

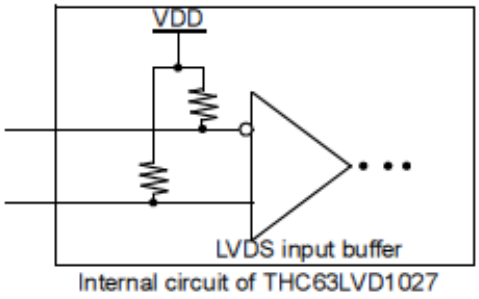

Figure 4. Fail Safe Circuit

Absolute Maximum Ratings

Table 4. Absolute Maximum Rating

Parameter	Min	Max	Unit
Power Supply Voltage	-0.3	+4.0	V
LVDS Input Voltage	-0.3	V_{DD}+0.3	V
Junction Temperature	-	125	°C
Storage Temperature	-55	125	°C
Reflow Peak Temperature / Time	-	260 / 10sec	°C
Maximum Power Dissipation @+25°C	-	2.5	W

Operating Conditions

LVDS Data Mapping

Dual-In / Dual-Out

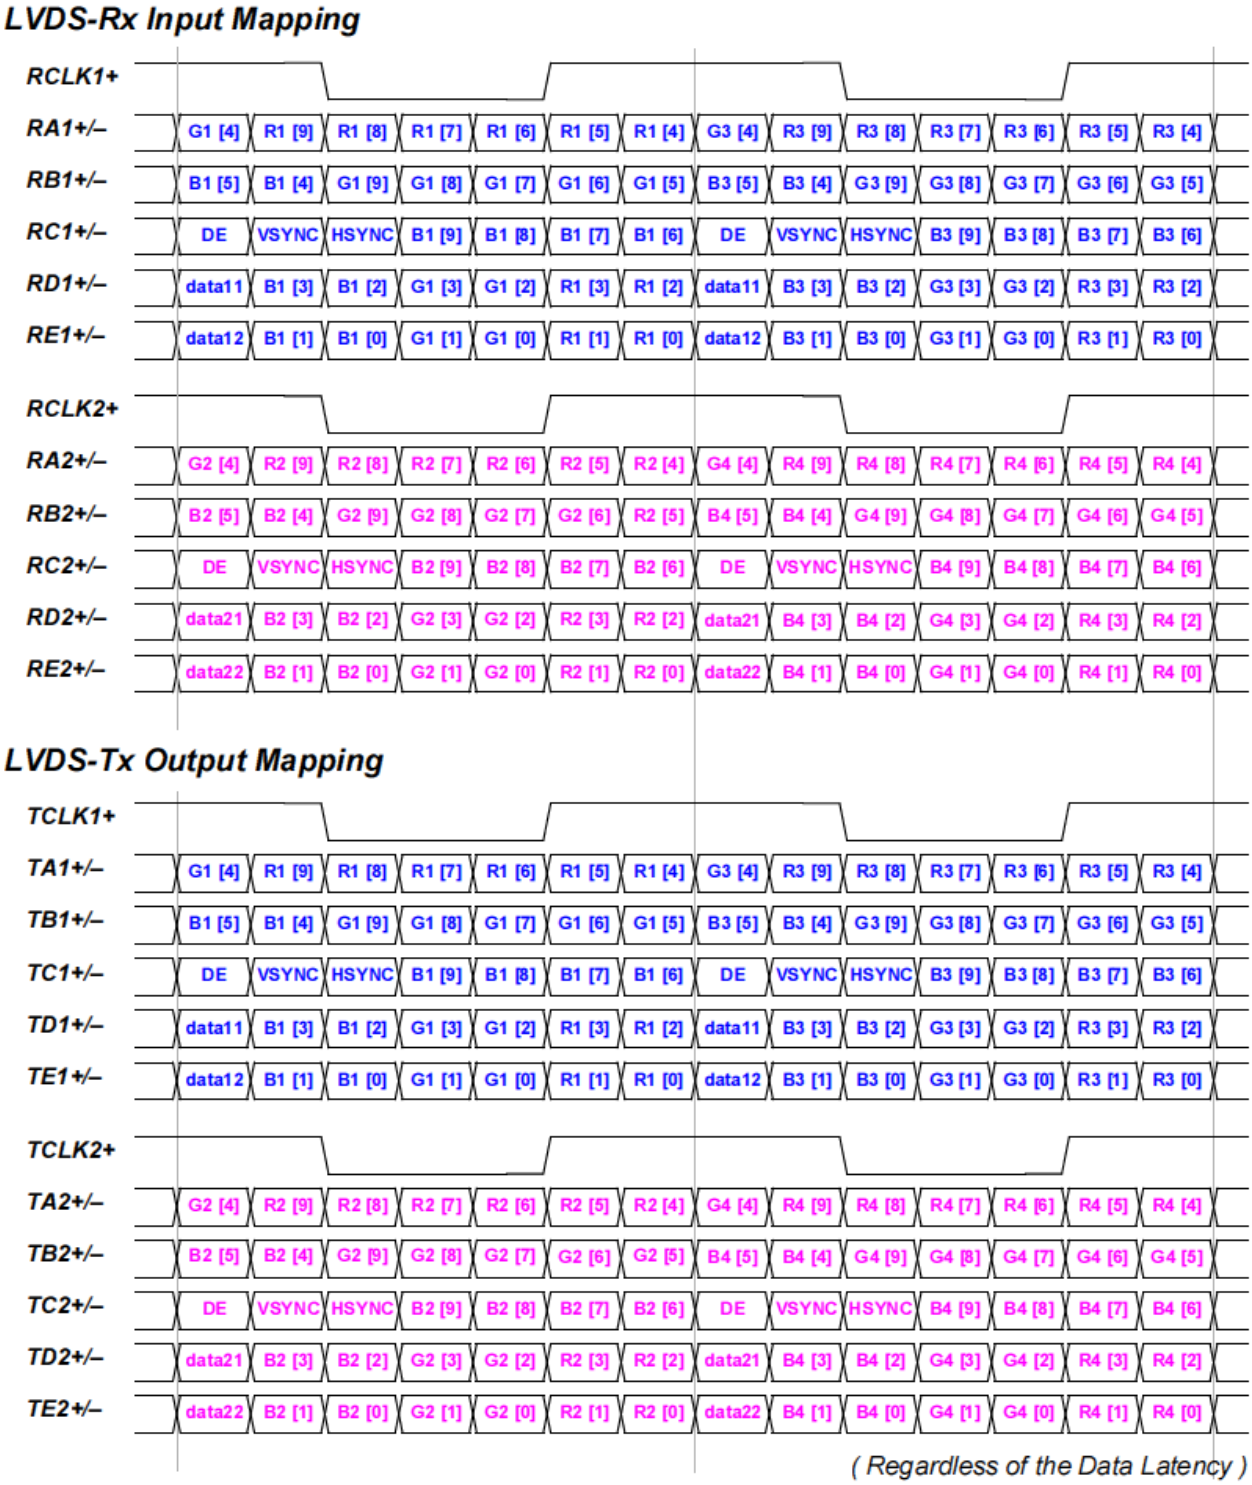

Figure 14-1. Data Mapping for Dual-In/Dual-Out

Distribution Mode

In Distribution mode, RCLK2+/- must be Hi-Z.

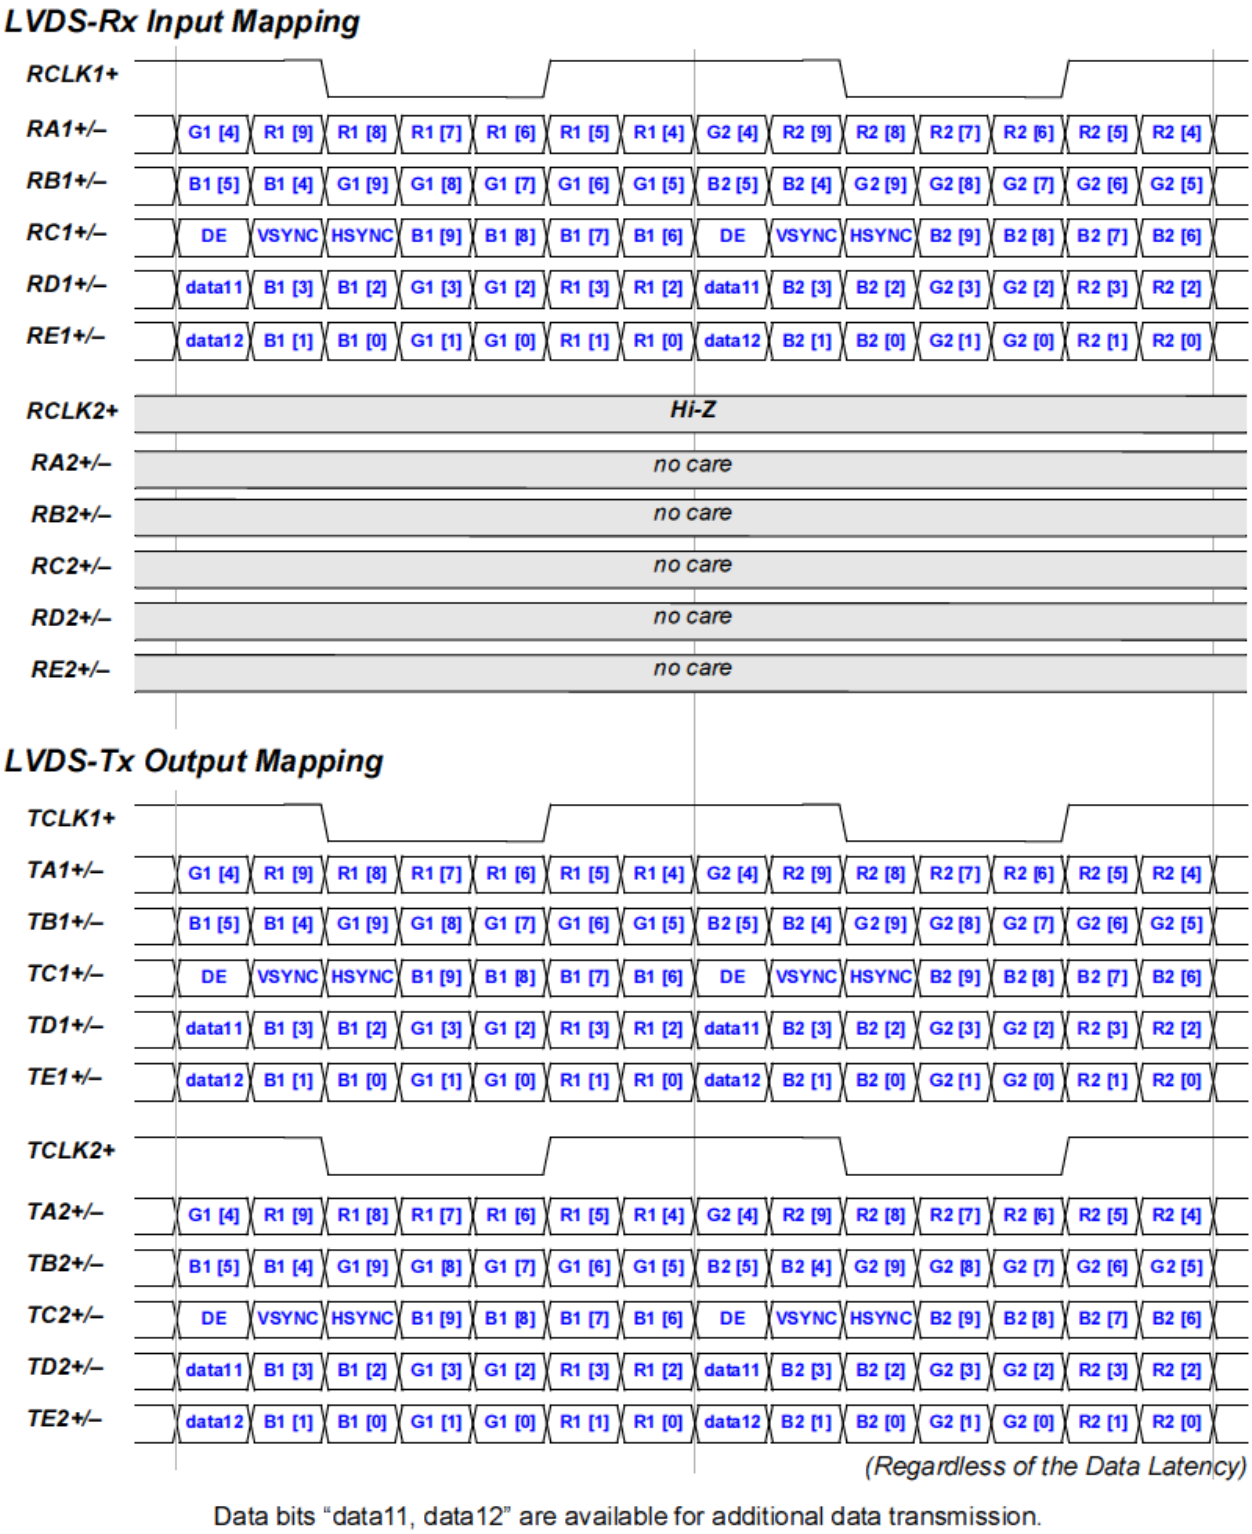

Figure 14-2. Data Mapping for Distribution mode

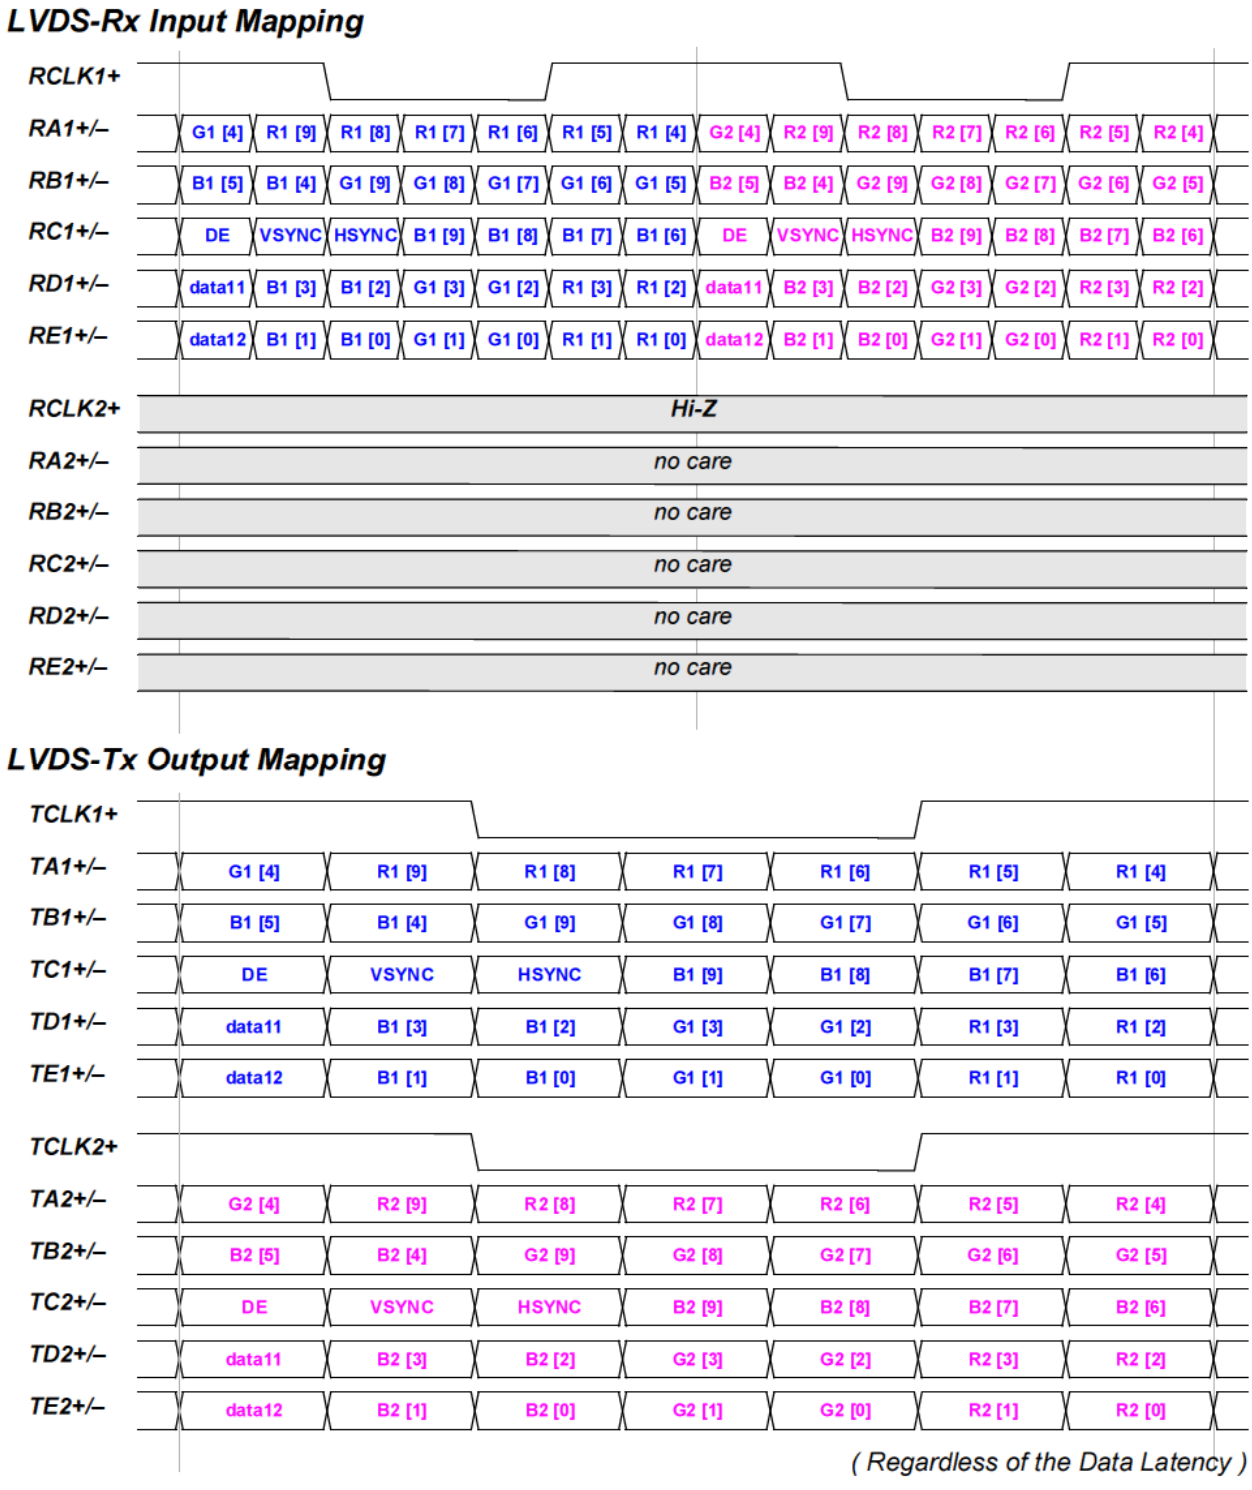
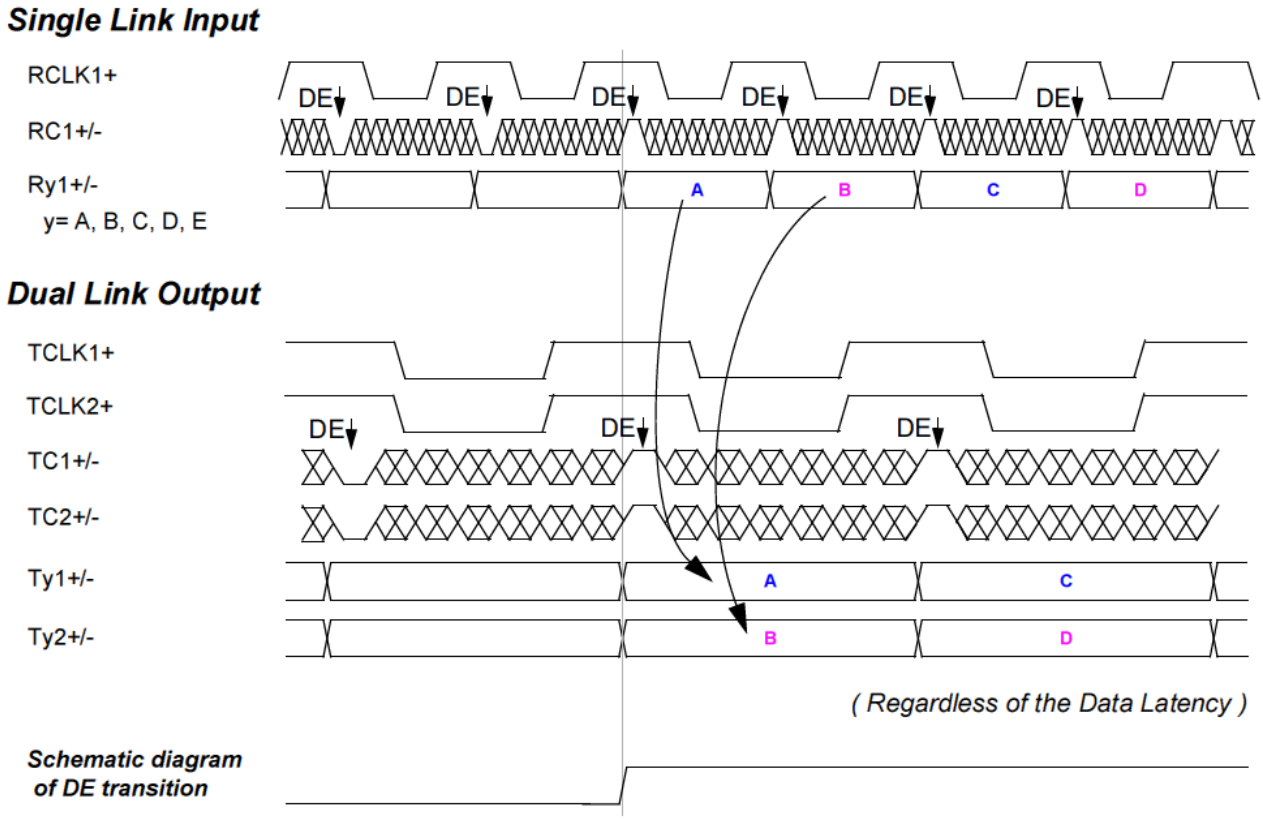
Single-In / Dual-Out

In Single-in / Dual-out mode, RCLK2+/- must be Hi-Z.



Data bits “data11, data12” are available for additional data transmission.

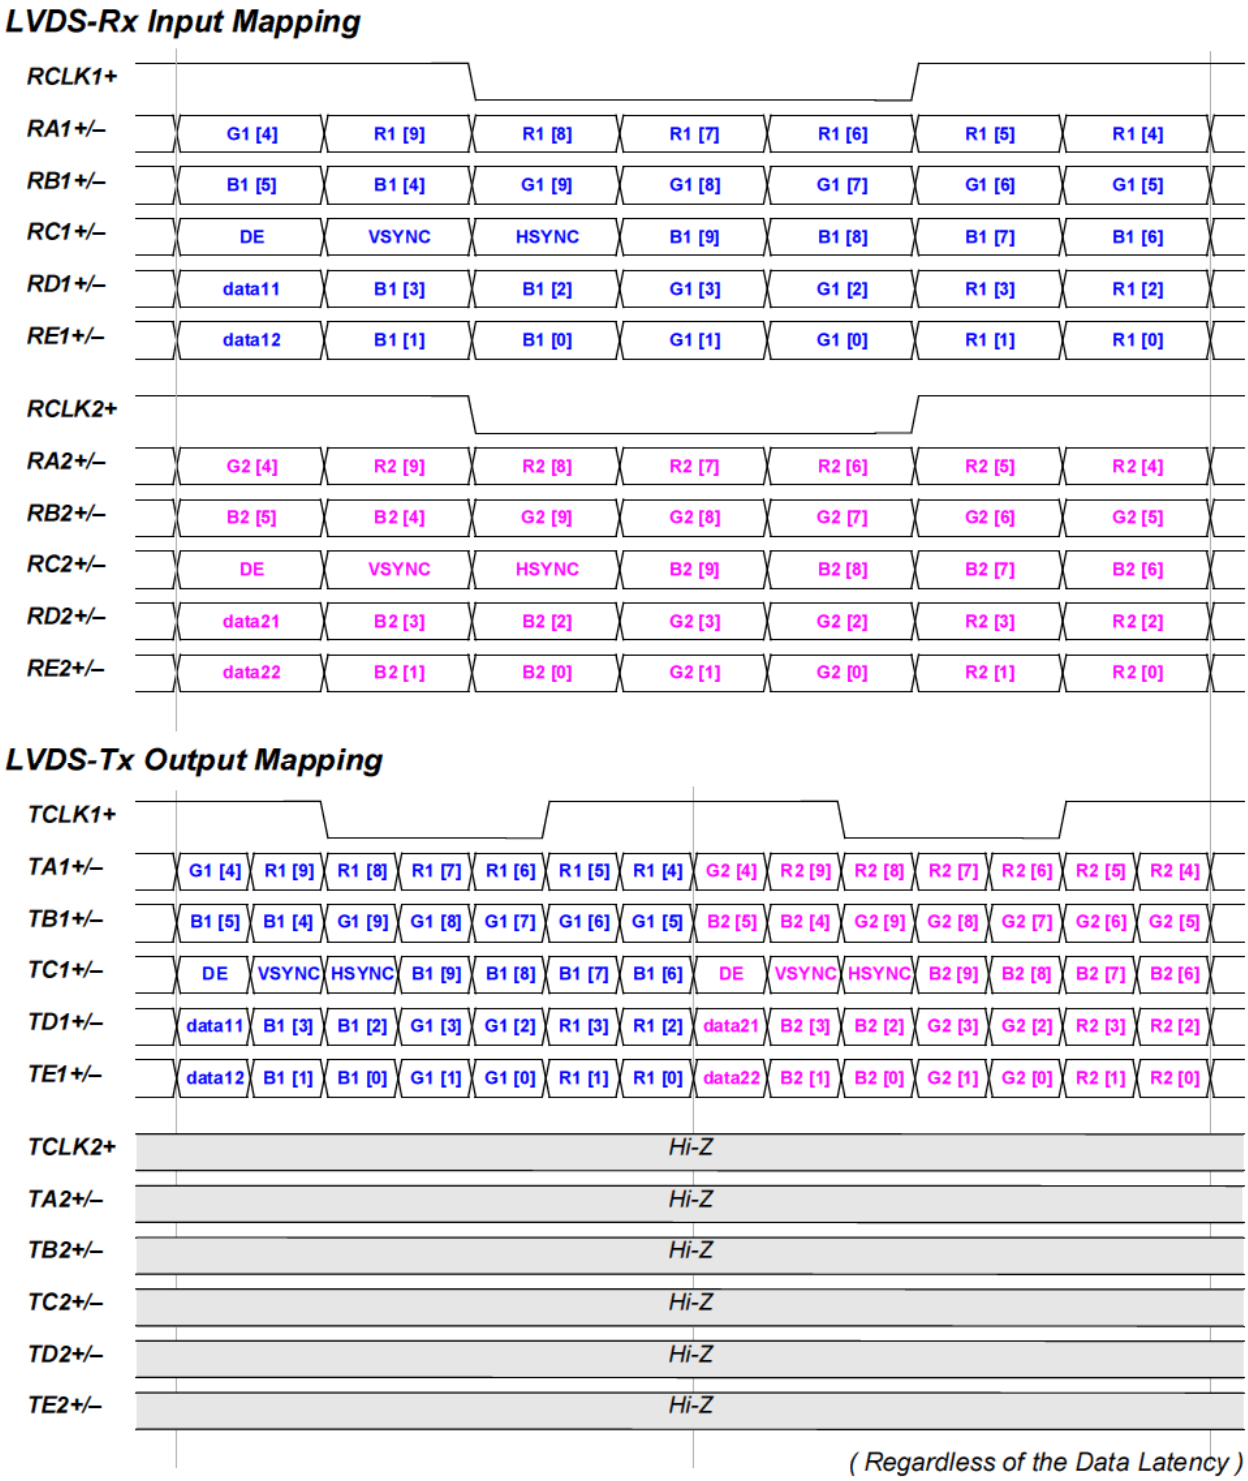
Figure 14-3(a). Data Mapping for Single-In/Dual-Out



Single-in / Dual-out mode uses DE signal L-to-H-edge to start distribution of input data.

Figure 14-3(b). Data Mapping for Single-In/Dual-Out

Dual-In / Single-Out



Data bits "data11, data12, data21, data22" are available for additional data transmission.

Figure 14-4. Data Mapping for Dual-In/Single-Out

Notes

1) LVDS input pin connection

When LVDS line is not derived from the previous device, the line is pulled up to 3.3V internally in THC63LVD1027. This can cause violation of absolute maximum ratings to the previous LVDS Tx device whose operating condition is lower voltage power supply than 3.3V. This phenomenon may happen at power on phase of the whole system including THC63LVD1027. One solution for this problem is PD=L control during no LVDS input period because pull-up resistors are cut off at power down state.

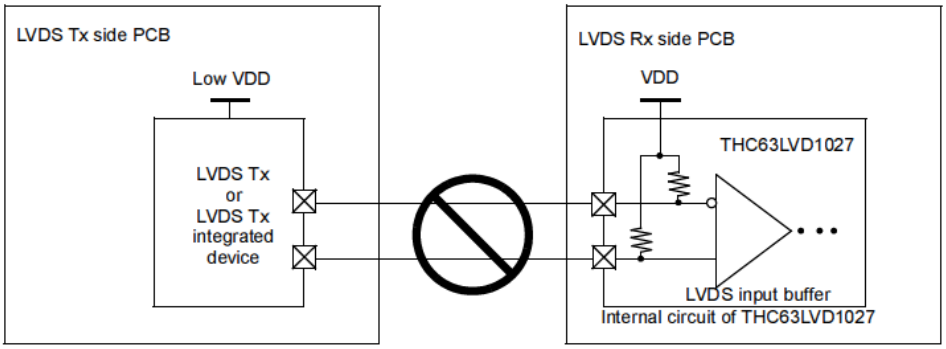


Figure 15. LVDS input pin connection

2) Power On Sequence

Don’t input RCLK1+/- and RCLK2+/- before THC63LVD1027 is on in order to keep absolute maximum ratings.

3)Cable Connection and Disconnection

Don't connect and disconnect the LVDS cable, when the power is supplied to the system.

4)GND Connection

Connect the each GND of the PCB which Transmitter, Receiver and THC63LVD1027 on it.
It is better for EMI reduction to place GND cable as close to LVDS cable as possible.

5)Multi Drop Connection

Multi drop connection is not recommended.

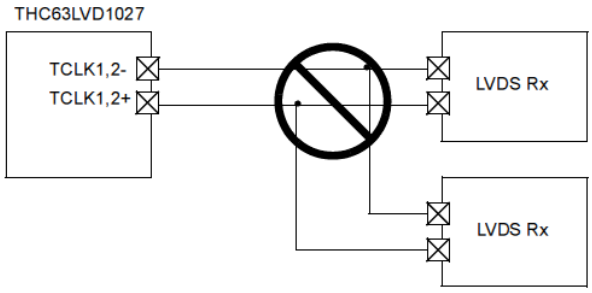

Figure 16.Multi Drop Connection

6)Asynchronous use

Asynchronous use such as following systems are not recommended.
Page.11 tCK12 spec should be kept.

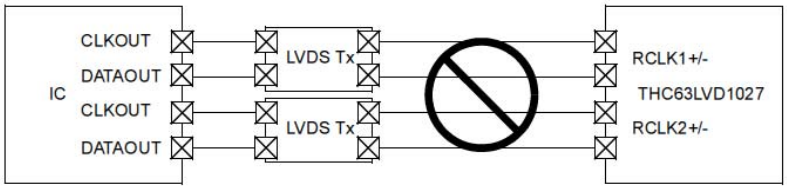

Figure 17-1. Asynchronous Use1

Asynchronous use such as following systems are not recommended.

Notices and Requests

1. The product specifications described in this material are subject to change without prior notice.
2. The circuit diagrams described in this material are examples of the application which may not always apply to the customer's design. We are not responsible for possible errors and omissions in this material. Please note if errors or omissions should be found in this material, we may not be able to correct them immediately.
3. This material contains our copyright, know-how or other proprietary. Copying or disclosing to third parties the contents of this material without our prior permission is prohibited.
4. Note that if infringement of any third party's industrial ownership should occur by using this product, we will be exempted from the responsibility unless it directly relates to the production process or functions of the product.
5. This product is presumed to be used for general electric equipment, not for the applications which require very high reliability (including medical equipment directly concerning people's life, aerospace equipment, or nuclear control equipment). Also, when using this product for the equipment concerned with the control and safety of the transportation means, the traffic signal equipment, or various Types of safety equipment, please do it after applying appropriate measures to the product.
6. Despite our utmost efforts to improve the quality and reliability of the product, faults will occur with a certain small probability, which is inevitable to a semi-conductor product. Therefore, you are encouraged to have sufficiently redundant or error preventive design applied to the use of the product so as not to have our product cause any social or public damage.
7. Please note that this product is not designed to be radiation-proof.
8. Customers are asked, if required, to judge by themselves if this product falls under the category of strategic goods under the Foreign Exchange and Foreign Trade Control Law.
