

SL Modular Connector System

molex

With its large number of options and configurations, SL Modular Connectors and Assemblies deliver ideal wire-to-wire solutions and its varying PCB termination methods, including reflow process capable versions, support a range of wire-to-board applications

Features and Advantages

Two independent points of contact

Offers redundant, secondary current paths for long-term electrical performance and reliability

Terminal position assurance (TPA) lock for male and female housings

Reduces the risk of terminal back-out in high-vibration environments

Low-profile, stackable housing, vertical and right-angle headers

Provides design flexibility with or without panel mounting

Connector position assurance (CPA) lock

Ensures wire-to-wire and wire-to-board mating interface will not disengage in high-vibration environments

2.54mm pitch

Enables intermatability with C-Grid and KK 2.54mm-pitch product families for the largest number of configurations in the industry

Positive lock

Provides secure retention between headers and receptacles

High-temperature LCP headers available

Reflow process capable. Enables automated termination to PCBs. Reduces labor costs.

High-temperature headers available, made with liquid crystal polymer (LCP)
