1. Introduction

Designed for electronic and IoT devices, the Taoglas SPKM range of dynamic audio miniature speakers deliver long-lasting pure and true sound, critical for a product that requires clear audio output.

With an 8 Ohm rating, the SPKM miniature speakers have high sensitivity and deliver distortion free, high fidelity audio. They can handle power burst in excess of 0.8W (over a short period) and are ideal solutions for applications requiring audio such as Smart Home and Security, IoT Devices or Toys.

Manufactured from high quality materials and high performance Neodymium magnets, they are designed for ease of integration and design flexibility. The speakers come in a variety of form factors and sizes and supplied with industry standard 32-AWG paired cables.
