

**MATERIAL**

Zinc-plated steel disc with threaded hole insert.

**NO-SLIP COATING**

(TPE) thermoplastic elastomer, black colour, 80 shore A.

**STANDARD EXECUTION**

(NdFeB) Neodymium-iron-boron retaining magnet, for temperatures up to 60°C.

Retaining magnets technical data (see page 759).

**FEATURES AND APPLICATIONS**

MSM-RM magnetic bases are shielded magnetic systems with high performances and moderate overall dimensions.

The elastomer surface increases the friction coefficient when lateral retaining forces are present, giving a better adhesion. These magnets are preferably used on sensitive surfaces.

**KEY TO TABLE DIMENSIONS**

f = fixing holes centre distance: it allows matching and fixing to bases

MSM-B (see page 910), connecting clamps MSM-I (see page 914) and flanged bolts type MSM-P (see page 925).
