TW:BT-4C-3/8-130, T-Handle Slip Type Torque Wrench, 3/8 in square drive, 130 lbs-in (14.69 Nm)

### Description

Ruland TW:BT-4C-3/8-130 is a T-handle slip type torque wrench with a 3/8" square drive size. It is preset at the factory to 130 lbs-in (10.83 lbs-ft, 14.69 Nm) of allowable torque. Upon reaching the specified torque value of 130 lbs-in (10.83 lbs-ft, 14.69 Nm), the torque wrench automatically releases and resets. This prevents tightening above the preset value, even with continued turning. The T-handle profile allows the user to easily grip the torque wrench and rotate by hand. TW:BT-4C-3/8-130 is manufactured by Seekonk Precision Tools in Massachusetts from chrome plated alloy steel for durability and longevity in industrial environments. It is made in accordance with Federal Specification MIL-STD-45662A and comes standard with an NIST traceable certification. Periodic calibration is required depending on frequency of use.
